

# Natech

## Q

Banking Solution which serves the secure and transparent implementation of the G.S.I.S. processes

# Natech.Q Overview

**NATECH.Q is a certified application materializing the requests of the Greek G.S.I.S (General Secretariat of Information Systems), concerning electronic incision and accounting records.**

The solution offers Financial Institutions the feasibility of the required procedures and their conformity to changing regulatory requirements while it is the basis for all the future services that may be incorporated by the G.S.I.S. through and by Teiresias SA. These implementations are mandatory from the Bank of Greece, the Greek Ministry of Finance and the Internal Revenue Service for all financial institutions operating in Greece.

Natech.Q incorporates Natech 's philosophy of high-level flexibility and adaptability, and enables instant adaptation to ever-changing regulatory requirements. It is based on Natech.DRP platform and has its own display, user management and Active Directory connectivity system, and requires minimal IT support and monitoring.

# Characteristics & Features

## Q1

Account registers Requests

## Q2

Account Transactions register Requests

## Q3

Loan registers Requests

## Q4

Accounts and products registers Mass Requests

- It is based on the Natech.DRP platform.
- It operates harmonically with Natech 's systems.
- It operates in heterogeneous computer systems.
- It incorporates features such as:
  - ✓ Reporting System
  - ✓ Document Management System
  - ✓ Connection System with Active Directory

Natech.Q connects directly to IBM WebSphere (MQ Series) and, using a Queues system, implements fully both the electronic seizure and the registry system safely and transparently.

NATECH.Q is constantly evolving in order to serve the changing messaging applications sent to financial institutions.

# Natech.Q

## Benefits

Fully automated application

Minimal IT support and monitoring

Direct implementation of the services integrated by the G.S.I.S

Continuous flow process in case of fault occurrence

Development based on regulatory requirements

Traceability of the background processes

Safe and transparent implementation of the G.S.I.S. process

Installation flexibility

Natech.Q is the only private system operating across disparate computer systems and has passed the complete set of the requirements, a lengthy procedure taking from 3-6 months.

Natech Q is trusted by:

- ✓ 10 banks operating in Greece
- ✓ Deposit and Loans Fund

# Natech.Q

## Why choose

**01** > Has

...unlimited expandability abilities in order to cover the needs of regulatory conformity of credit institutions.

**02** > Is

...the basis for all the future services that may be incorporated by the G.S.I.S. (through Teiresias SA - Bank Information Systems SA)

**03** > Is

...the first system to operate across disparate computer systems since it is already trusted by 10 banks operating in Greece

The company
